Testimonials

"Thank you for agreeing to scan my aura recently; I really enjoyed the space you have created in which to perform this work and felt very comfortable and safe there. The meditation technique you took me thru was extremely helpful and has been providing some interesting results immediately. Your capable, caring and professional manner was also most appreciated. Thank you and I am delighted to refer people to your practice."

Yours sincerely,
Judith Chappell

"Before beginning the workshop, my aura scan showed that my lower chakras were very imbalanced. Leo took me through a series of meditations that involved grounding, and clearing the blocks in my chakras. He helped me identify childhood issues and guided me through the psychological and spiritual work required to clear them from my emotional body. What really amazed me about Leo's meditation course was that it didn't require years of painful, long drawn-out therapy for me to clear issues that existed even from my childhood. Just ten days of powerful, guided meditations have put me firmly on the track to recovery."

"I was frequently getting pain in my chest and my friends scared me saying it could be a heart problem. But after an aura scan I found out the pain was caused due to gas and indigestion. Now I am careful with my diet and the pain has disappeared. This was a cheap and effective way of solving my problem."
